

**Village of Doaktown
Water & Wastewater Systems Operator**

The Village of Doaktown has a permanent position for a Water & Wastewater Systems Operator.

The successful applicant will be responsible for the operation and maintenance of the Village water and sanitary sewer systems, which are comprised of several water booster pumping stations, water mains, service connections, chlorination systems, wastewater collection system, sewage pumping systems, and wastewater treatment lagoon.

This position, depending on the capabilities and time of the successful candidate, may have supervisory or other municipal duties related to other Village-owned infrastructure.

This position also requires a dedicated individual with sound judgment, and good communication and interpersonal skills.

A minimum Grade Twelve education or equivalent relevant experience.

The successful candidate must be willing to locate within the municipality.

Preference will be given to candidates with experience in the field of municipal water systems.

Doaktown offers the successful candidate opportunities for regular training and upgrading opportunities, while working with modern infrastructure.

Doaktown combines urban services in a rural-like setting to provide a high quality of life to naturalists and others.

A complete job description is available from the Village Clerk.

Interested, qualified candidates are asked to submit a resume with references on or before July 23, 2010, at 4:00 p.m. to:

Marilyn E. Price, Village Clerk
Village of Doaktown, 8 Miramichi Street, Doaktown, NB E9C 1C8
