

Water & Wastewater Fundamentals

October 24-25, 2017

Halifax, NS

COURSE OBJECTIVES:

This two day workshop is designed for learners to develop a good working knowledge of the fundamental science and math required of all water and wastewater operators. Key concepts are introduced by addressing the language and foundational components of the industry in a step by step process. Operators are prepared for success in the various levels of training required to obtain certification and meet the growing demands of the industry.

WHO SHOULD ATTEND:

This two day workshop is geared to new or prospective water and wastewater operators. Experienced and-or certified operators may also benefit from this workshop if they wish to challenge a higher level or just want to reinforce or enhance their basic knowledge.

OUTLINE:

Day One	Day Two
Introductions Housekeeping & Expectations	Formulas
A Brief History of Water and Wastewater	Dosage Calculations
Terminology and Pesky Acronyms	Problem Solving
Coffee	Coffee
Environmental Hydrology, What is Water?	Measuring, Monitoring and Metering
Water Quality, Sources, Standards and Expectations	Ideal Gas Laws and Reality Checks
Water and Wastewater Chemistry	Environmental and Safety Issues
Lunch On Your Own	Lunch On Your Own
