## Cross Connection Control

October 13-14, 2026 (8:30 AM – 12:30 PM AST)

### Course Objective / Description:

This knowledge-based course will allow students to gain an understanding of the importance of protecting the water supply from contamination.

### What will be covered:

- How to recognize and prevent physical and potential cross connections
- Purpose and scope of plumbing regulations with respect to preventing contamination of water supply
- Back-siphonage and backflow theory
- How to prevent backflow
- Six basic mechanical backflow prevention devices

| Lesson                         | Description                                | Contact Hours |
|--------------------------------|--------------------------------------------|---------------|
| 1                              | Introduction – Protection of Public Health | 0.75          |
| 2                              | Backflow Theory                            | 1.0           |
| <b>Break (0.25)</b>            |                                            |               |
| 3                              | The Building Code                          | 0.75          |
| 4                              | How Backflow is Prevented                  | 1.0           |
| 5                              | How Backflow is Prevented (Cont'd)         | 0.25          |
| 6                              | Case Histories                             | 1.75          |
| <b>Break (0.25)</b>            |                                            |               |
| 7                              | Demonstration of Devices/Equipment         | 1.0           |
| 8                              | Exam                                       | 0.5           |
| <b>Total Instruction Time:</b> |                                            | <b>7.0</b>    |
